

## Professional Summary

Proactive, target-driven Computer Science undergraduate with direct client-facing experience through freelance work and a track record of clear, consistent communication under deadline pressure. Comfortable building relationships with people outside my immediate technical circle and translating what a client actually needs into a delivered outcome. Looking to bring that same discipline to business development – generating and nurturing client relationships in a fast-paced, target-driven environment.

**Key Strengths** Client Relationship Management · Requirement Gathering · Deadline-Driven Delivery · Verbal & Written Communication · Fluent in English and Hindi · Fast Learner in Unfamiliar Domains

## Education

2024–2028 **Bachelor of Technology (B.Tech)**, *Computer Science Engineering*, ITM Skills University

○ Current CGPA: 9.1

2023–2024 **Higher Secondary Education (Class XII)**

2021–2022 **Secondary Education (Class X)**

## Experience

2025 **Freelance Web Developer**, *Self-employed*

- Acted as the sole point of contact for a paying client – a tax consulting firm – from first conversation through final delivery.
- Ran requirement-gathering discussions to convert a vague client ask into a concrete, buildable scope.
- Proactively updated the client at each milestone rather than waiting to be asked, reducing back-and-forth and building trust.
- Managed scope and expectations when client requests shifted mid-project, without missing the agreed deadline.
- Closed the engagement with a satisfied, paying client – direct evidence of being able to manage a relationship from pitch to delivery.

## Projects

2026 **Healthcare Management System**

- Worked within a team to design a product around real end-user needs (patients and staff), not just technical requirements.
- Owned feature planning discussions, weighing what mattered most to users against what was feasible to build.

2026 **Real-Time URL Analytics System**

- Built dashboards to present activity data in a way a non-technical viewer could act on – the same instinct needed to present numbers to a client.
- Practiced pulling a clear story out of raw data, a skill directly transferable to market and lead research.

2025 **Music Streaming Platform**

- Contributed to a full-stack build as part of a team, coordinating on scope and integration points with teammates.

2025 **P2P Payment Web Application**

- Built a peer-to-peer payment platform, including secure user authentication and transaction handling – direct exposure to how a transaction-based product actually works end to end.
- Gave a practical understanding of trust, security, and reliability concerns that matter when pitching or supporting a financial or transaction-based product.

## Additional Skills

**Professional** Relationship Building, Problem Solving, Market Research, Adaptability, Time Management, Team Collaboration

Technical Python, JavaScript, React.js, Node.js, FastAPI, SQL, Git & GitHub – useful for speaking credibly with technical clients and teams

Tools Microsoft Excel, Microsoft PowerPoint, Canva – used to build presentations and business model decks

## Leadership and Activities

Regularly take on coordination roles in team-based academic projects – aligning people, not just writing code.

Self-taught across multiple technologies and domains, reflecting a genuine ability to learn fast on the job.
