THIS CERTIFIES THAT

Viketh Hegde

HAS SUCCESSFULLY COMPLETED

> **Practical Network Penetration Testing Fundamentals**

A comprehensive, hands-on offensive security workshop focused on the philosophy that to attack a system, you must first understand how it is built. Practical training covered active reconnaissance using Nmap, identifying protocol flaws in SMBv1 (CVE-2017-0144 / MS17-010 EternalBlue), weaponizing the vulnerability through the Metasploit Framework, and executing post-exploitation control to escalate privileges and dump hashes.

Issued on: 20th May 2026

Certification ID: #MSB-003
